

We are excited to be planning for a safe and healthy summer 2021. While these remain uncertain times, CRS is following best practices and planning safeguards that will allow us to run camp even if we continue to face a threat from COVID-19.

Here are a few measures we are prepared to implement as needed depending on the current situation.

- Increased infirmary space with the ability to isolate those potentially contagious
- Increased sanitization practices
- Pre-arrival health screening
- Drop Off Check-In and Pick-Up with a staggered schedule to minimize the number of people on campus at any one time
- Additional handwashing stations
- Daily health screening
- Limit contact between campers using a cohort strategy
- Education campers and staff on healthy practices
- Deep cleaning of all facilities between groups of campers

We are confident that we can implement these strategies and more as needed to continue to offer a fun and exciting camp experience for our campers. We look forward to serving our campers and their families again!
